

APPLEPAY METHOD

WHAT'S NEEDED:

- CC {NonVBV}:

Low security cards, you can't get them off sites, they have to be checked and verified as "Auto-Add cards" before being sold out, get them off spammers for 100% hit dtdpaymentsbot.pages.dev on telegram, he is vouched and verified for cards. get off him. he also gives walkthrough.

An iPhone or ipad or ios laptop

HOW TO GO ABOUT IT STEP BY STEP:

First go to your wallet app on your iPhone and click on it. Before doing this, you should have gotten a Non VBV CC that looks like this:

4154178722541265:12:25:406:JasonWolterman::3101NorthSideAve.:Henric
o:VA::23228

Now once its open it looks like the picture above, click on the “+” icon top right corner to add card info.

Now click on “Add Card’

Now click on “Debit or Credit Card”

Then the next page pops up and you input the Full name and card number on the CC info you bought.

The next page you're to input the Expiration date and Security Code (CVV) on the card

Then click “Next” and then it brings you to the next page to accept “Terms and Conditions”, Click on “AGREE”, Since the card is a non vbv there’s no need for OTP or verification from bank, it auto adds to your Apple Pay.

NOW ONCE IT LINKS ITS BEST TIME TO WIPE THE CARD (CASHOUT)

THERE ARE MANY METHODS OF CASHING OUT;

- **P2P-SEND TO ANOTHER APPLE PAY**
- **TAP AND PAY AT STORES OR ATM**
- **USE TO BUY THINGS ONLINE etc.**
