

# PAYPAL METHOD

## Requirements

- CC {Non VBV}:  
Low security cards, you can't get them off sites, they have to be checked and verified as "Auto-Add cards" before being sold out, get them off spammers for 100% hit [dtdpaymentsbt.pages.dev](https://t.me/dtdpaymentsbt.pages.dev) on telegram is vouched and verified for cards, get off him, he also gives walkthroughs.
- An iPhone or iPad or Android
- Common Sense
- A Paypal account (new or old)

## **HOW TO GO ABOUT IT:**

Firstly, get your NON VBV and a good VPN or Proxy to use, you could get that off [dtdpaymentsbot.pages.dev](https://t.me/dtdpaymentsbot.pages.dev) on telegram he is a verified vendor for those on telegram and also if you need a walkthrough on this.

When you cop a NON VBV card it comes with the card holder's info, address, IP address, connect the Proxy or VPN, make sure your PayPal account is logged in on that device the proxy is on, the PayPal account could be new or old, based on the account limit.

NOTE: THE PAYPAL ACCOUNT YOU ARE USING CAN BE NEW AND UNVERIFIED  
YOU WIPE BASED ON THEACCOUNT LIMIT.

STEP 1:

Login to a new or old PayPal account, then connect your proxy, you can get a  
PayPal open up with full access and also a proxy from  
[dtdpaymentsbot.pages.dev](https://dtdpaymentsbot.pages.dev) once logged in head over to connecting the  
Debit Card you bought

Click the '+' sign to add the card and this below should be the next screen

Click on 'Debits and Credit cards' and the next screen should be this below:

Now click on 'Enter your card info' and enter the info of the card you bought correctly in this format:

Now click on 'Add card', and the card should be automatically added,

Name

Visa Prepaid \*\*\*\*3146

[Give it a nickname](#)

Expires on

08/25

[Remove](#)

- You can either send out of the card directly to another PayPal,
- Add balance to your PayPal Balance using the card, this is the best way.
- Use to pay for things online on any store that accept PayPal
- Or link your bank and schedule a transfer.
